

LIGNO OCS02™

CORDYCEPS SINENSIS

冬虫夏草

STANDARDIZED FREEZE-DRIED CULTIVATED OPHIOCORDYCEPS SINENSIS FRUITING BODY

(The world's first commercial cultivated
Cordyceps sinensis fruiting body)

cultivated *C.sinensis*

SCIENTIFIC NAME

Ophiocordyceps sinensis

COMMON NAME

caterpillar fungus

冬虫夏草(DongChongXiaCao)

SPECIFICATION

>30% total polysaccharide

>15% beta glucan

Cordyceps sinensis "winter-worm summer-grass", has been known as an effective tonic in Traditional Chinese Medicine, and is increasingly used as a popular supplement and/or medicine. Traditional healers have recommended this fungus as a tonic for all illnesses, for its reputed abilities to treat conditions including respiration diseases; renal, liver, and cardiovascular diseases; hyposexuality; and hyperlipidemia. It is also used in the treatment of immune disorders and is believed to be a remedy for weakness and fatigue. Many also believe it to be a treatment for impotence, acting as an aphrodisiac.

WHAT IS LIGNO OCS02™?

OCS02™ is the freeze-dried powder of cultivated *C. sinensis* fruiting body produced using our proprietary solid stage fermentation technology. It is suitable for vegetarian as no insect material is used in the culture medium.
